

Gather Round × Saltbox — The Catalog Demo

May 19, 2026
Confidential

Operational brief for the business agent · What exists, what to show, how to open the conversation

What this is

A fully interactive curriculum catalog mockup built from Rebecca Spooner's real cover artwork, real lesson titles, and real activity break prompts — rendered at the visual scale of a premium streaming platform. It is a working demonstration, not a wireframe. Rebecca can open it in a browser and click through her own content today.

THE FULL CATALOG — WHAT IS IN THE DEMO

★ = real GR cover artwork imported · number = verified lesson count from her TOC

WORLD GEOGRAPHY

★ Africa · 20 Indigenous Peoples · 28 Hawaii · 18 Australia · 22

AMERICAN STATES

Georgia · 14 Kentucky · 13 Illinois · 12 Indiana · 11 Iowa · 11 Kansas · 12
Idaho · 12

FAITH + WORSHIP

★ Growing Up With God · 10 Hymn Study · 16

SCIENCE + DISCOVERY

★ Human Body · 22 ★ Inventions + Ideas · 20 ★ Botany · 20

SEASONAL

Advent · 25 Fourth of July · 8

ARTS + LIVING

★ Life Skills · 20 ★ Farming + Food · 28 ★ Beekeeping · 12

7 paths with real GR cover artwork. All lesson titles are verbatim from her published TOCs. Egypt and Mali activity break prompts are her exact printed text.

WHAT THE DEMO DOES INTERACTIVELY

Browse mode: Dark grid with cream artwork cards — her covers at streaming-platform scale. Featured row shows Africa, Growing Up With God, Life Skills.

Search: Filters all paths in real time by title.

Path detail: Click any path → full lesson sequence, numbered in order, exactly as published.

Activity breaks: Egypt and Mali units are expandable — click the gold "Activity" badge to read her verbatim prompt in context. This is her pedagogy, interactive.

XRPL badge: Legacy Pass — Verified indicator in the header throughout. One visual, entire access model explained.

WHAT THE DEMO PROVES — IN ONE SENTENCE EACH

Scale: Her existing 20+ paths map to a navigable library without one word of content being rewritten.

Artistry first: Her covers are the visual language of the platform. Nothing was designed around them — they simply are the design.

Content depth: A lesson title list is not a course. 20 country-specific Africa lessons with geography, culture, and activity prompts is a journey. The demo makes that visible.

Infrastructure: One person built this from cover images and a PDF table of contents in a single session. That is the 10x argument in action.

HOW TO OPEN THE CONVERSATION — CANADIAN MOM REGISTER

"I've been building a companion for my own homeschool family and I kept coming back to your curriculum. You built exactly what God put in front of you, at exactly the right time, exactly how it needed to be made. I have tools that can take that work and make it reach families in places a printed PDF can't go. Can I show you what twenty minutes of your lesson titles looks like in it?"

Do not lead with the technology. Lead with what she already has — the artistry, the timing, the trust of her community. The catalog is the proof, not the pitch. Send the demo URL before any call. Let her click through her own covers. She will ask the questions.

THE COMPOUND CONTENT GRAPH — THE GROWTH ARGUMENT

Her paths already connect. The platform makes the connections visible — and that is what drives compound growth.

A family finishing Africa encounters ecosystem content. That surfaces Botany. Botany leads to pollinators — Beekeeping. Beekeeping surfaces the food system — Farming + Food. Four purchases that feel like a natural path of curiosity, not a sales funnel. This is the catalogue depth she already has, made navigable.
