

Gather Round Legacy Pass owners already paid for their curriculum. This PoC demonstrates one claim: scan a QR code, Saltbox reads the NFT on the XRP Ledger, and the device is fully loaded and works offline — no re-downloading, no account, no friction between the purchase and the page. The paragraphs below are first-hand accounts from three families who ran the demo.

The demo, step by step

- 1 Family opens Saltbox on a new device — nothing is there yet.
- 2 They tap Settings → Gather Round Legacy Pass and enter their XRPL wallet address.
- 3 Saltbox calls account_nfts on the XRP Ledger mainnet. If the NFT from Gather Round's issuer address is present, access is confirmed — no server involved.
- 4 Full Founding Family status is saved to the device. All curriculum content loaded in the previous session (on another device) was already bundled into the transfer QR.
- 5 Airplane mode on. Open Today. Every lesson, PDF, and audio file is present.

Technical summary

Ledger call	account_nfts — public XRPL JSON-RPC, no API key, no Saltbox server.
NFT filter	Issuer address + Taxon 1 (configurable). Gather Round sets the issuer; Saltbox reads it.
Device binding	NFT token ID and wallet address are stored in IndexedDB. No cloud sync of credentials.
Offline proof	After verification, the device functions entirely offline. No re-check needed.
Handoff	The device-to-device QR (built separately) bundles curriculum content. Pass verification and content transfer are independent steps — either can run first.

Family friction stories

Family 1

Write one paragraph here: what was slow or fragile before, what the family did in the demo, and what changed. Focus on the moment they realised the device already had everything.

Family 2

Second family account — same structure. Name, curriculum, the friction point, the demo moment, and the sentence that made you write it down.

Family 3

Third family account. If the family used the QR-code device handoff in the same session, note that specifically — it is the clearest proof of the sync story.
