

The Hub Roastery has been roasting small batch coffee in Sioux Lookout since 2016. We are highly selective about the coffee farms we work with, demanding complete visibility over the supply chain from seed to cup. Today, we only trade with a handful of sustainable coffee growers in South America. We roast our small-batch coffee in-house using beans exclusively from sustainable Central American coffee co-ops.

Sioux Mountain Blend

By far our most popular blend and the one that put The Hub Roastery on the map. This is a classic medium roast coffee that's sweet, savoury and perfectly balanced. Made from a blend of beans from farmer Don Lencho in Honduras and the Honduras Highland Chelon farmer co-op.
